services. Federal statute and subsequent Medicare regulations regarding provision and payment for medical services are lengthy. They are not repeated in this LCD. Neither Medicare payment policy rules nor this LCD replace, modify or supersede applicable state statutes regarding medical practice or other health practice professions acts, definitions and/or scopes of practice. All providers who report services for Medicare payment must fully understand and follow all existing laws, regulations and rules for Medicare payment for chiropractic services and must properly submit only valid claims for them. Please review and understand them and apply the medical necessity provisions in the policy within the context of the manual rules. Relevant CMS manual instructions and policies regarding chiropractic services are found in the following Internet-Only Manuals (IOMs) published on the CMS Web site:

- *Medicare Benefit Policy Manual* – Pub. 100-2, Chapter 15, Section 30.5, Section 240.1.3.
- *Medicare National Coverage Determinations Manual* – Pub. 100-03.
- *Correct Coding Initiative – Medicare Contractor Beneficiary and Provider Communications Manual* – Pub. 100-09, Chapter 5.
- Title XVIII of the Social Security Act, Section 1862(a)(1)(A) states that no Medicare payment shall be made for items or services which are not reasonable and necessary for the diagnosis or treatment of illness or injury.
- Title XVIII of the Social Security Act, Section 1833(e) states that no payment shall be made to any provider for any claim that lacks the necessary information to process the claim.
- Title XVIII of the Social Security Act, Section 1862(a)(1)(D). Investigational or experimental.

#### Coverage Guidance

#### **Coverage Indications, Limitations, and/or Medical Necessity**

**Notice:** It is not appropriate to bill Medicare for services that are not covered (as described by this entire LCD) as if they are covered. When billing for non-covered services, use the appropriate modifier.

Chiropractic services are subject to national regulation, which provides definitions, indications and limitations for Medicare payment of chiropractic service. Please see *Medicare Benefit Manual* sections referenced above for national definitions, indications and limitations.

Medicare expects that acute symptoms/signs due to subluxation or acute exacerbation/recurrence of symptoms/signs due to subluxation might be treated vigorously. Improvement in the patient's symptoms is expected and in order for payment for chiropractic services to continue, should be demonstrated within a time frame consistent with the patient's clinical presentation. Failure of the patient's symptoms to improve accordingly or sustained worsening of symptoms should prompt referral of the patient for evaluation and/or treatment by an appropriate practitioner.

This LCD imposes diagnosis limitations that support diagnosis to procedure code automated denials. Medicare will allow up to 12 chiropractic manipulations per calendar month and 30 chiropractic manipulation services per beneficiary per calendar year. Despite allowing up to these maximums, each patient's condition and response to treatment must medically warrant the number of services reported for payment, and Medicare does not expect that patients will routinely require the maximum allowable number of services. Additionally, Medicare requires the medical necessity for each service to be clearly demonstrated in the patient's medical record.

Covered diagnoses are displayed in four groups in this policy, with the groups being displayed in ascending specificity. Medicare does not expect that substantially more than the following numbers of treatments will usually be required:

- Twelve (12) chiropractic manipulation treatments for Group A diagnoses.
- Eighteen (18) chiropractic manipulation treatments for Group B diagnoses.
- Twenty-four (24) chiropractic manipulation treatments for Group C diagnoses.
- Thirty (30) chiropractic manipulation treatments for Group D diagnoses.

**Notice:** This LCD imposes diagnosis limitations that support diagnosis to procedure code automated denials. However, services performed for any given diagnosis must meet all of the indications and limitations stated in this policy, the general requirements for medical necessity as stated in CMS payment policy manuals, any and all existing CMS NCDs, and all Medicare payment rules.

As published in CMS IOM, Pub. 100-08, Section **13.5.1**, to be covered under Medicare, a service shall be reasonable and necessary. When appropriate, contractors shall describe the circumstances under which the proposed LCD for the service is considered reasonable and necessary under Section 1862(a)(1)(A). Contractors shall consider a service to be reasonable and necessary if the contractor determines that the service is:

- Safe and effective.
- Not experimental or investigational (exception: routine costs of qualifying clinical trial services with dates of service on or after September 19, 2000, that meet the requirements of the clinical trials NCD are considered reasonable and necessary).
- Appropriate, including the duration and frequency that is considered appropriate for the service, in terms of whether it is:
  - Furnished in accordance with accepted standards of medical practice for the diagnosis or treatment of the patient's condition or to improve the function of a malformed body member.
  - Furnished in a setting appropriate to the patient's medical needs and condition.
  - Ordered and furnished by qualified personnel.
  - One that meets, but does not exceed, the patient's medical needs.
  - At least as beneficial as an existing and available medically appropriate alternative.

## Coding Information

Bill Type Codes:

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

999x Not Applicable

Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory; unless specified in the policy services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.

99999 Not Applicable

CPT/HCPCS Codes

**Group 1 Paragraph:** Providers are reminded to refer to the long descriptors of the CPT codes in their CPT books.

**Group 1 Codes:**

98940 Chiropract manj 1-2 regions

98941 Chiropract manj 3-4 regions

98942 Chiropractic manj 5 regions

ICD-10 Codes that Support Medical Necessity

**Group 1 Paragraph:** The CPT/HCPCS codes included in this LCD will be subjected to "procedure to diagnosis" editing. The following lists include only those diagnoses for which the identified CPT/HCPCS procedures are covered. If a covered diagnosis is not on the claim, the edit will automatically deny the service as not medically

necessary.

Medicare is establishing the following limited coverage for **CPT/HCPCS codes 98940, 98941 and 98942:**

Associated Information

### **Documentation Requirements**

1. Documentation supporting medical necessity should be legible, maintained in the patient's medical record and made available to Medicare upon request.
2. Please see *Medicare Benefit Manual* sections referenced above for national documentation requirements for Medicare payment of chiropractic services.

3. For Medicare purposes, a chiropractor **must** place an AT modifier on a claim when providing active/corrective treatment to treat acute or chronic subluxation. However the presence of the AT modifier may not in all instances indicate that the service is reasonable and necessary. As always, contractors may deny if appropriate after medical review.
4. Maintenance therapy includes services that seek to prevent disease, promote health and prolong and enhance the quality of life, or maintain or prevent deterioration of a chronic condition. When further clinical improvement cannot reasonably be expected from continuous ongoing care, and the chiropractic treatment becomes supportive rather than corrective in nature, the treatment is then considered maintenance therapy. The AT modifier must not be placed on the claim when maintenance therapy has been provided. Claims without the AT modifier will be considered as maintenance therapy and denied. Chiropractors who give or receive from beneficiaries an ABN shall follow the instructions in Pub. 100-04, Medicare Claims Processing Manual, chapter 23, section 20.9.1.1 and include a GA (or in rare instances a GZ) modifier on the claim.

See Medicare Benefit Policy Manual 100-2, Chapter 15, section 240.1.3

### **Utilization Guidelines**

The following number of chiropractic manipulation services per beneficiary is considered reasonable and necessary if the medical record supports the service regardless of the nature of the visit (i.e., acute injury, acute exacerbation).

- Twelve (12) chiropractic manipulation treatments per calendar month.
- And,
- Thirty (30) chiropractic manipulation treatments per calendar year.

This LCD imposes diagnosis limitations that support diagnosis to procedure code automatic denials. Coverage diagnoses are displayed in four groups in this policy as described in the indications and limitations section of this policy. If 30 visits are performed for group D, then this will also serve as the maximum number of visits for the year.

In accordance with CMS Ruling 95-1 (V), utilization of these services should be consistent with locally acceptable standards of practice.

If a national or local policy identifies a frequency expectation, a claim for a test/service that exceeds that expectation may be denied as not reasonable and necessary. Documentation may be submitted with the claim for individual consideration if reporting increased frequency of services.

**Notice:** This LCD imposes utilization guideline limitations. Despite Medicare allowing up to these maximums, each patient's condition and response to treatment must medically warrant the number of services reported for payment. Medicare requires the medical necessity for each service reported to be clearly demonstrated in the patient's medical record. Medicare expects that patients will not routinely require the maximum allowable number of services.
